WHY IT COSTS LESS

How we charge $99.95 when agencies charge thousands.

No corners cut. Just fewer people in the parts that don't need them.

01

The preview comes first.

We start from your Google listing and build a custom preview before anyone sells you anything. No discovery calls.

02

AI does the first draft.

The first build is AI-assisted. Then you tell us what to change, as many times as you want.

03

Software checks every site.

Before you see it, an automated check tests that pages load, tap to call works, the contact form sends and Google can read it.

04

No account managers.

Changes happen by text. No status meetings, and nobody billing you an hour to read an email.

05

You pay after you've seen it.

You only pay once you want the site live. $99.95 a month, $0 setup, cancel anytime.

FOR COMPARISON

What a typical agency charges

- Local SEO: $500 to $3,000 a month
- Entry level retainer: $1,000 to $3,000 a month
- Ads management: 15% to 20% of your ad spend
- Often a 3 to 12 month minimum
- Ranges from WebFX, Ahrefs and Clicks Geek

Cheap to run. Not cheap work.

When money gets tight, the phone still has to ring.
